

Free Conceptual Design for - Residential

Outdoor Entertaining Areas

Raised Gardens and seating

Commercial & Hospitality

YOU WANT A FREE CONCEPTUAL DESIGN?

Here is how it works! **EASY** as 1 - 2- 3

STEP 1

View our showroom - our websites - our brochures

Tectonic manufacture a large range of home and commercial products, so you need some idea of what you want for your project. Our In-House consultation service is so much easier if you can come down to our showroom and see the products on display. We can also show you some of the various concepts we have undertaken for previous clients, as well as photos of completed landscape and entertaining areas. Feel free to drop in to our Christchurch factory showroom, or call for an appointment to get our full attention!

For out-of-town enquiries, we will happily post brochures to you and can discuss your project requirements fully over the phone or by email.

STEP 2

Help us to help you! Provide us with the dimensions of the area for your make-over. A scale plan is best, but a general sketch of the area will suffice. For existing gardens, a couple of photos would be beneficial.

Give some thought to what products you would like. For example: a water feature, planters and seating, outdoor kitchen, fireplace or a simple raised vegetable garden, so we have as much information as necessary to get your property plan just the way you want it.

Not really sure what you want or just looking for ideas? Leave it to us. We can start afresh on a plan-the inspiration might be just what you need!

STEP 3

We design you a concept. Although usually within a week - please allow up to 4 weeks for this complimentary service. We often create 2 or 3 different initial design options to suit your area. We will then submit these to you (email is easiest), and then we can discuss with you any changes or modifications you desire. The plan can then be re-worked at no cost until you are happy with the result.

TECTONIC will provide scale 3 dimensional plans at no obligation and no cost to you. All part of the friendly service at TECTONIC.

What to expect from here..... Love the concept? Love the product? Great. We can then submit a no obligation quotation. One of the great things about TECTONIC products is that they are modular. Do one area at a time - add that fountain at a later date or renovate your BBQ setting once the garden is sorted. It is entirely up to you-choose the components YOU want - do it YOUR way.

We are happy to discuss custom making, colour options, on-site services, delivery and installation options and any other enquiries you may have.

Tec TONIC

Po Box 15-087, Christchurch 8643
